### RATE THIS CHALLENGE

In this challenge, you must read an integer, a double, and a String from stdin, then print the values according to the instructions in the Output Format section below. To make the problem a little easier, a portion of the code is provided for you in the editor.

**Note:** We recommend completing [Java Stdin and Stdout I](#) before attempting this challenge.

### Input Format

There are three lines of input:

1. The first line contains an integer.
2. The second line contains a double.
3. The third line contains a String.

### Output Format

There are three lines of output:

1. On the first line, print `String:` followed by the unaltered String read from stdin.
2. On the second line, print `Double:` followed by the unaltered double read from stdin.
3. On the third line, print `Int:` followed by the unaltered integer read from stdin.

To make the problem easier, a portion of the code is already provided in the editor.

**Note:** If you use the `nextLine()` method immediately following the `nextInt()` method, recall that `nextInt()` reads integer tokens; because of this, the last newline character for that line of integer input is still queued in the input buffer and the next `nextLine()` will be reading the remainder of the integer line (which is empty).

### Sample Input

```
42
3.1415
Welcome to HackerRank's Java tutorials!
```

### Sample Output

```
String: Welcome to HackerRank's Java tutorials!
Double: 3.1415
Int: 42
```

Change Theme

Language

Java 7

```
1 import java.util.Scanner;
2
3 public class Solution {
4
```

```
5      public static void main(String[] args) {
6          Scanner sc=new Scanner(System.in);
7              int x=sc.nextInt();
8              double y=sc.nextDouble();
9              sc.nextLine();
10             String s=sc.nextLine();
11
12
13             System.out.println("String: "+s);
14             System.out.println("Double: "+y);
15             System.out.println("Int: "+x);
16         }
17     }
18
```
